1 INTRODUCTION

Sakhalin Energy Investment Company Ltd. (Sakhalin Energy) considers regular and meaningful engagement with the public and key stakeholders, as well as public disclosure of relevant project information, to be important elements for the successful development of the Sakhalin-2 project (the project). To this end, since very beginning Sakhalin Energy has actively sought to engage with stakeholders and provide information about its activities.

This document describes Sakhalin Energy's public consultation and the disclosure of information as of 31 December 2018, and includes:

- Summary of consultation held in 2018.
- Summary of consultation held with different stakeholder categories.
- Summary of feedback from consultation.
- Information of community grievance procedure implementation.

There are five appendices to this document:

- Appendix 1 provides a summary of non-governmental and community organisations which have been involved to date.
- Appendix 2 provides information on locations of information centres and contact details of the company representatives.
- Appendix 3 provides contact information for distribution of SIMDP information materials.
- Appendix 4 list the existing stakeholders in Japan, in particular, on the island of Hokkaido.
- Appendix 5 list used abbreviations.

Sakhalin Energy will update this report on an annual basis.

2 CONSULTATION AND INFORMATION DISCLOSURE IN 2018: SCOPE AND FEEDBACK

2.1 Consultations carried out in 2018: general information

The types of consultation Sakhalin Energy has carried out in 2018 are presented in the Table 1 below.

Table 1: Types of consultation carried out in 2018

TYPE	EXAMPLES
Public consultations	<ul style="list-style-type: none"> Public meetings (in local administrations, culture centres, libraries) Public hearings under the environmental impact assessment in accordance with the RF legislation Dialogues with stakeholders within frame of sustainable development report preparation Public consultations with indigenous peoples
Group meetings	<ul style="list-style-type: none"> Focus group meetings with indigenous people under SIMDP Mid-Term Review Seminars, information sessions (e.g., under grant programmes)
Individual meetings, etc	<ul style="list-style-type: none"> Meetings with experts (e.g., administration, specialists from health, education, social or cultural departments, entrepreneurs, key figures in the community) Public opinion survey in form of an interview

2.2 Stakeholder engagement within framework of sustainable development report preparation

In 2009 Sakhalin Energy decided to follow the public non-financial reporting standard of the Global Reporting Initiative (GRI) (www.globalreporting.org).

Sustainable development report covers the results of Sakhalin Energy activities, including environmental protection, personnel development, stakeholder engagement, social projects and other aspects. Sustainable development report is available in public domain at the company's official website, Sakhalin Energy's information centres, located in the Sakhalin communities, company's office in Korsakov and is widely distributed among project's stakeholders.

As part of preparation of the reports, the company commits to hold regular consultations with stakeholders, so they can share their opinions on the company's activity and make recommendations on further development of the company's responsibility in production, environment and social areas.

Consultations are conducted in a form of dialogue twice a year. During the first round of a dialogue the company presents preliminary information on the company's activities for the reporting period to stakeholders. Participants of the dialogue comment and discuss what additional information of wide audience interest might be included into the report, ask questions. During the second round of the dialogue the company responds to the stakeholders' comments and questions received during the first round of the dialogue. Results of consultations are included into sustainable development report of the corresponding reporting period.

Stakeholders involved in these dialogues are local communities, NGOs, authorities, experts that usually engage with Sakhalin Energy on the issues of environment, social and other areas of sustainable development. Direct written invitation method is used to contact the participants prior to the dialogues as well as open invitations via regional newspapers and internet resources. In addition, the company invites stakeholders to contribute to sustainable development reporting through a questionnaire (appended to each sustainable development report).

In 2018 the company conducted two rounds of the dialogue:

- February 2018 – the second round of the dialogue under 2017 sustainable development report preparation, where the company answered questions and comments received during the first round of the dialogue. Summary of dialogues within the framework of 2017 sustainable development report is included into the report (see the report on the company's website: http://www.sakhalinenergy.ru/en/media/sd_report/).
- October 2018 – the first round of the dialogue under 2018 sustainable development report preparation, where the company presented to stakeholders information on the company's activities and achievements for the reporting period.

Also in November-December 2018 under the preparation of the report for 2018, detailed consultations were conducted with all key groups of stakeholders, including shareholders, customers, government authorities, lenders, company staff, contractors, NGOs, community, etc. The main methods of engagement were survey (including forms distribution via e-mail to stakeholders, staff survey) and face to face meetings. In addition, there was survey under annual public meetings.

The summaries of stakeholders' dialogues within 2018 sustainable development report preparation were included into the report, Appendix 2 (see the report on the company's website: http://www.sakhalinenergy.ru/en/media/sd_report/).

In April 2018 the company conducted a public presentation of 2017 sustainable development report in Moscow. Representatives of scientific and expert community, federal and regional authorities, business, indigenous people, NGOs and other society representatives and mass-media attended the presentation.

Successful public endorsement of the 2017 sustainable development report conducted by non-financial reporting Council of Russian Union of industrialists and entrepreneurs (RSPP) became a major milestone. As it underlined in the RSPP conclusion, the report "contains important information, covers all key areas of responsible business practice in compliance with the principles of Russian Business Social Charter and with sufficient completeness of information on the company's activities in these areas". RSPP conclusion and certificate are available in the Sustainable Development Report (Appendixes 7 and 8).

2.3 Consultation and information disclosure in project affected communities

Sakhalin Energy endeavoured to ensure that the people and groups it consulted with were representative and inclusive of vulnerable groups; respect local traditions and cultural norms in discussions and decision-making; and that face-to-face meetings arranged are varied and create conditions that encourage wide and diverse participation.

2.3.1 Public meetings

In 2018 Sakhalin Energy conducted public meetings in 13 communities. The reports about the meetings and concerns raised by the communities can be found on company's website <http://www.sakhalinenergy.ru/en/social/pr/>. Please refer to the Table 2 in Section 2.1. for more details.

The information on date, time and venue for the public meetings were announced in key Sakhalin newspapers (as listed in the Table 4 in Section 2.5) three weeks prior to the public meeting. The timetable of the meetings was available on the company's website <http://www.sakhalinenergy.ru/en/social/community/>.

2.3.2 Public hearings on 4D seismic project

A 4D seismic project was held in 2018 over two fields operated by Sakhalin Energy: Lunskeye and Piltun-Astokhskeye. The project is the next step in Sakhalin Energy strategy to use 4D seismic as key areal reservoir surveillance technology. General contractor on 4D seismic survey implementation was Sovcomflot Geo.

The company together with the contractor developed a design package, which included impact assessment according to international and Russian requirements. Relevant public hearings were held in January 2018 in the Nogliki and Okha. Appropriate notifications about the hearings and materials publications/their availability (including EIA) were made in December 2017 as per RF requirements. In total 24 participants attended the meetings (Nogliki – 18, Okha – 6).

The questions at the meetings were about the seismic methods, impact on gray whales

observes on vessels, and how customer participates in the implementation of compensation measures for compensation of damage to marine bioresources. All the questions were addressed during the meetings.

A positive State Environmental Expert Review conclusion was obtained for the project. Actual surveys were held in Q2-Q3 2018 with zero incidents.

This seismic campaign was also on the agenda of all WGWAP panel meetings.

2.3.3 Consultations and information disclosure with residents in the vicinity of Prigorodnoye complex accommodation facilities

In 2018 the company specialists held one meeting (in June) with Korsakov residents living in close proximity to Prigorodnoye complex accommodation facilities under social impact monitoring programme in order to identify potential concerns and impacts, to monitor post resolution of grievances and to inform the community on project implementation status. No concerns or questions were raised.

2.3.4 Consultation and information disclosure via Community Liaison Structure

2.3.4.1 General

As a result of 2014 restructuring, the community liaison organisation was re-configured into a community liaison structure.

Key role in the Community Liaison Structure of the company is played by two teams within the Corporate Affairs Division: Communication and Media Relations Subdivision and Social Performance Subdivision. Specialists of the above teams provide community liaison services in compliance with their job descriptions.

The Sakhalin Energy community liaison structure also includes:

- 23 information centres based in the local village and district libraries
- Two Community Liaison Specialists (SIM Engagement Specialist and Korsakov Community Liaison Specialist)

2.3.4.2 Information Centres

As in previous years, an efficient means of engagement with the Sakhalin population was a network of 23 information centres based on district and rural libraries and located in settlements along the pipeline route and in the vicinity of other company's facilities. The information about the company information centres was published in key Sakhalin newspapers (the list of newspapers is provided in the Table 3 in Section 2.3.5), posted on the company's information boards and on the company's website. Thanks to the information centres Sakhalin Energy established an effective system of receiving feedback from communities residing in close vicinity to Sakhalin Energy assets. On the regular basis Sakhalin Energy provided information materials to affected communities via company's information centres, including the following types of materials:

- corporate news-bulletin Vesti,
- annual PCDP and PCDR,
- sustainable development report,
- grievance procedure leaflets,
- posters with information on social programmes, etc.

Community residents had an opportunity to contact the company's information centre

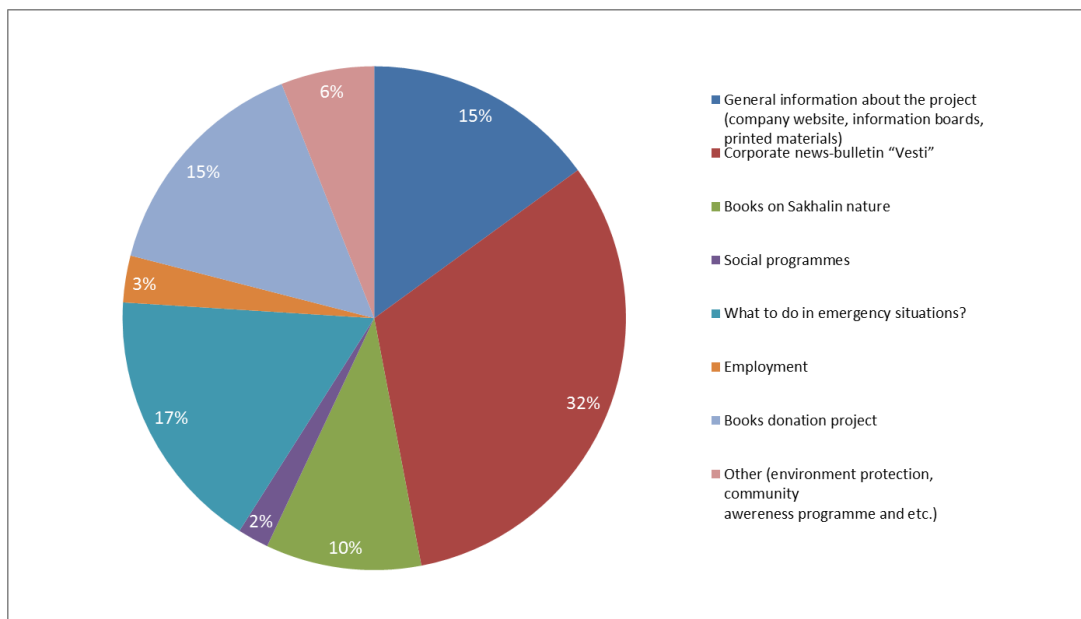

consultants any time during the regular library business hours at their convenience. The list of company's information centres is maintained on Sakhalin Energy website and in 2018 Sustainable Development report in Appendix 2 (see the report on the company's website: http://www.sakhalinenergy.ru/en/media/sd_report/).

In October 2018, information centre consultants participated in a regular annual training workshop to gain better knowledge of the company's activity. The workshop programme included the following key topics:

- Overview of the Sakhalin-2 project.
- Information centres: results of activity and plans for 2019.
- Sakhalin Energy's public non-financial reporting: sustainable development report. Participation in the 1st dialogue with stakeholders.
- OPF compression station project.
- UN Sustainable Development Goals
- Grievance procedure.
- Volunteering
- Biodiversity
- Book donation project.

5203 people visited Sakhalin Energy's information centres in 2018.

The main questions that have been asked through Sakhalin Energy's information centres are shown on the diagram below (on the results of the information centres work). Majority of people expressed their interest in the company's information materials including the company's website and corporate news-bulletin *Vesti* as well as company's social programmes.

2.3.4.3 Community Liaison Officers

Since February 2017 there was opened CLO office in Korsakov. CLO has open hours twice a week. There were 255 visitors of Korsakov CLO office in 2018. The most popular questions are employment, participation in SD projects, etc.

In 2018 SIM Engagement Specialist held 228 meetings during open hours and consultations in IP districts with local citizens and IP representatives. The raised questions were participation in company's social programmes, SIMDP programmes/projects, employment, etc.

2.3.5 Consultations and information disclosure with members of gardeners' non-commercial partnership "Stroitel"

Throughout 2018 Sakhalin Energy continued engagement with dacha community and responded to queries or questions during consultations with the community leader and other representatives. In addition, Sakhalin Energy continued implementing the quality of life monitoring (including air quality and noise levels monitoring) during the dacha season, i.e. May-October, as required under the HSESAP and which is open to the dacha residents through presence during the measurements. The results of the monitoring were regularly reported to the chairman of the dacha community.

Table 3: The engagement with dacha owners in 2018

Date	Engagement	Description
January	Invitation to company dialogue with stakeholders under the preparation of the sustainable development report for 2017. The dialogue was held on 2 February.	The invitation was sent to the chairperson of "Stroitel" cooperative. Two dacha owners participated in the dialogue with stakeholders under the preparation of the sustainable development report for 2017 (see details below in the table).
2 February	Dialogue with stakeholders under the preparation of the sustainable development report for 2017.	Two dacha owners participated in the dialogue. Issue discussed: the chairperson of the dacha community participated in the dialogue and requested to arrange meeting with the CEO of the company, asked to solve the problem of the dacha owners' non-commercial partnership's resettlement due to the LNG Train 3 project. Also, she raised question on soil and air monitoring, which was done in 2011-2012 by the Institute of Agriculture according to the "Stroitel" cooperative request. Company's representatives were not involved into this survey. The company's response: the company's responses are provided in Appendix 2 of Sustainable Development report 2017 in Appendix 2 (see the report on the company's website: http://www.sakhalinenergy.ru/en/media/sd_report/).
2 April	Meeting with the Head of Corporate Affairs	Two dacha owners participated in the meeting. During the meeting they: - asked the company to invite members of

Date	Engagement	Description
	Department.	<p>regulatory bodies, Ministry of Natural Resources and Supervisory Board to focused meeting with dacha owners, and requested to arrange a meeting with CEO of the company or Finance Director as a members of Supervisory Board.</p> <ul style="list-style-type: none"> - raised questions on compensation payment, size of SPZ. <p>The company's response:</p> <ul style="list-style-type: none"> - the company is ready to arrange focused meeting and ensure the presence of its specialists. Head of Corporate Affairs Department on a regular basis personally informs the CEO of the situation related to the dacha cooperative. All questions received from dacha owners are explored and discussed by the company's specialists at a working meeting on behalf of the management. - the company is not authorised to invite representatives of the RF state authorities or members of the Supervisory Board to focused meeting with dacha owners. - All dacha owners received compensation. Company offered two types of compensation to choose between: 100% of the property market value for those who agreed to leave the land plots; 50% of the property market value to those who did not want to leave their land plot. <p>The company is ready to arrange focused meeting with the company's specialist on SPZ.</p> <p>The letter with the minutes of meeting was sent to the chairperson.</p>
May	Invitation to the regular public meeting with the company's specialists.	The invitation was sent to the chairperson of "Stroitel" cooperative. Two dacha owners participated the meeting (see details below in the table).
May-October	Air and noise monitoring during the dacha season.	<p>As a rule, the dacha owners were invited to participate in all these monitoring sessions. But they did not participate in air and noise monitoring.</p> <p>Results of air and noise monitoring were sent to the chairperson of the dacha community. No questions were raised by the dacha's owners.</p>
June	Public meeting with the company's specialists (8	<p>Two dacha owners participated the meeting.</p> <p>They raised questions on Train 3 project, SPZ size, soil monitoring, meeting with the CEO of the</p>

Date	Engagement	Description
	June)	company. The meeting's protocol with company's responses is available on the company's web site. http://www.sakhalinenergy.ru/en/social/pr/
	Notification of the planned maintenance works with gas flaring at the Prigorodnoye production complex.	No questions were raised by the dacha's owners.
11 July	Meeting under the social monitoring .	<p>There was a meeting with the chairperson. The chairperson raised questions on Train 3 project, SPZ size, soil monitoring, also the chairperson asked the company to raise the dachas resettlement/compensation issue on the Supervisory Board meeting and provided the response to this request.</p> <p>The letter with the company's response was sent to the chairperson (please see below the letter extract):</p> <p>"Engagement with stakeholders and community is the responsibility of Sakhalin Energy corporate affair department. The company's position related to the dachas resettlement/compensation issue was several times provided during public meetings and in the letters (the last one was sent to the chairperson in March 2018). The company is ready to arrange a focused meeting with company's specialists and reply your questions".</p>
	Notification on the gas flaring at the Prigorodnoye Production Complex due to the loading of the gas tanker after the planned repair in the drydock.	No questions were raised by the dacha's owners.
October	Invitation to company dialogue with stakeholders	<p>The invitation was sent to the chairperson of "Stroitel" cooperative.</p> <p>Dacha owners did not attend the dialogue.</p>

Date	Engagement	Description
	under the preparation of the sustainable development report for 2018. The dialogue was held on 24 October	
November	Invitation to public meeting with the company's specialists	The invitation was sent to the chairperson of "Stroitel" cooperative. Three dacha owners were presented at the meeting (see details below in the table).
	Public meeting with the company's specialists (22 November)	<p>Three dacha owners participated the meeting. During the meeting dacha owners raised questions on emissions, flaring, social monitoring.</p> <p>The company's response:</p> <ul style="list-style-type: none"> - regarding emissions - the company's specialists provided information about the results of emissions monitoring; - regarding flare - the company responded that it informs the population of the Korsakov district and the chairperson of dachas about all cases of flare; - regarding the social impact monitoring - the information received by the company's specialists reaches to the management of the company. <p>The meeting's protocol with company's responses is available on the company's web site. http://www.sakhalinenergy.ru/en/social/pr/</p>
Through the whole year around	Ad hoc phone engagement	Invitation to company dialogue with stakeholders under the preparation of the sustainable development report, public meeting with the company's specialists, social monitoring, to participate in air and noise monitoring, notification on the gas flaring at the Prigorodnoye Production Complex and etc.

2.3.6 Other methods of communication with affected communities

Sakhalin Energy provided regular information about the project in advertisements, question and answer sessions and in local media (newspapers are listed in Section 2.5) and on the company's public website: www.sakhalinenergy.ru (Russian) and www.sakhalinenergy.com (English).

In electronic version:

- corporate internet site.

In hard copies the following material was distributed:

- corporate news-bulletin *Vesti*;
- sustainable development report;
- Sakhalin-2 project leaflet;
- lenders and lenders' independent consultant HSESAP implementation reports;
- grievance procedure leaflets;
- annual PCDP and PCDR.

In 2018 Sakhalin Energy continued to operate special free hotlines:

- For telephone queries and complaints from communities within Sakhalin Island – numbers are 8 800 200 6624 (toll free). Available for Russian and English speakers, as well as under the caller's request, he/she can be provided with the opportunity to talk to either male or female operators.
- Telephone +7 4242 66 2723 (for Japanese stakeholders, in English; an interpreter to/from Japanese can be arranged upon request).
- Safety issues – number is +7 4242 66 2500 (dial from Sakhalin Island).

2.3.7 Community awareness programme

In 2018 Sakhalin Energy continued the information campaign as part of the community awareness programme on the rules of safe behaviour at the onshore pipeline and optic fiber cable safety zone.

The campaign involved publication of articles explaining the rules of the safe behaviour at the onshore pipeline and optic fiber cable safety zone in district newspapers four times in 2018 on a quarterly basis (the list of the newspapers is provided in the Table 4). Also, this information was included in the presentation provided during public meetings in district centres of key project-affected communities in 2018 (details on the meetings are provided in the Table 2). Besides, the Onshore Pipeline Department issued individual letters to all land users (including organisations and private households) in the onshore pipeline vicinity with explanation of the rules of the safe behaviour at the onshore pipeline safety zone.

2.3.8 Public opinion survey

The annual public opinion survey is one of the monitoring tools to ascertain public attitude towards the project. In 2018 the survey was conducted in 14 Sakhalin communities, which are situated in close vicinity of the project activities. Individual interviews with a questionnaire serve as a primary method of the survey. No significant issues or impacts under Sakhalin-2 project were identified as a result of 2018 survey.

2.4 Indigenous stakeholders

In 2018 the company continued its regular engagement with representatives of Sakhalin indigenous communities in the areas of traditional indigenous residence and traditional economic activities. Following the recommendations received at the SIMDP development stage, the partners put special emphasis on raising public awareness of ongoing programmes and opportunities they would offer. For this purpose, the following was done in 2018:

- Public meetings were held with Sakhalin indigenous people (publicly, in groups and individually).
- Sakhalin indigenous minorities development plan's website was extensively used (www.simdp.ru).
- Regular information bulletin and other plan-related printed materials (leaflets, etc.) were issued and distributed among the stakeholders' community.
- Updated and distributed documentations on the information boards, sent documents to the stakeholders (members of Regulatory Bodies of the plan, non-governmental organisations, tribal communities and municipal authorities, IP specialists of administrations) in 13 communities: Okha, Nekrasovka, Val, Nogliki, Tymovskoye, Chir-Unvd, Aleksandrovsk-Sakhalinsky, Viakhtu, Trambaus, Smirnykh, Buyukly, Poronaisk, Yuzhno-Sakhalinsk.
- Individual consultation regarding applications for financial support, participation in programmes and projects implementation under the SIMDP.
- Conducted CLO open hours in traditional areas of indigenous residence (see section 2.3.4).
- Issued press-release, published articles, media coverage of events concerning Sakhalin IP.

In February 2018 representatives of the Regional Council of IP authorised representatives, Sakhalin Energy and Sakhalin Oblast Government had public meetings and meetings with representatives of IP, municipal authorities, NGOs and IP community in 11 settlements of traditional indigenous residence and economic activities (13 meetings). In particular, the participants were informed about SIMDP 3 implementation for 2017 and 2018, grievance procedure related to the plan, programmes of SIMDP 3, announcement of a grant contests under traditional economic activities support programme, and social development fund update and events for 2018. Then there were discussions of the above topics and other issues related to implementation and management of the plan at large and some of its programmes. A total of 187 people joined the discussion.

The SIMDP Mid-Term Review was held in 2018. Two approaches were applied during the evaluation: public opinion survey and quality enquires and studies conducted by the following group: an independent IP expert, an independent IP representative, and an independent sociologist. The external monitoring report is available on SIMDP website by the end of March 2019 (<http://www.simdp.ru/?id=18&pid=13>).

2.5 Consultations and disclosure in other Sakhalin communities

Sakhalin Energy provided information on the company's public website: www.sakhalinenergy.ru (Russian) and www.sakhalinenergy.com (English). Web sites of the company's key social programmes were maintained (SIMDP – www.simdp.ru, The Safety is Important – www.senya-spasatel.ru, Fund Energy – www.fondenergy.ru, Korsakov Partnership Council – www.korsakovsovet.ru).

Sakhalin residents could also use the two main Sakhalin Island newspapers (Gubernskiye Vedomosti and Sovetsky Sakhalin) as well as leading electronic information agencies (IA "Sakh.com", TIA "Ostrova", RIA "Sakhalin-Kurilly", IA "Citysakh", IA "SakhalinMedia") for details of project news. In addition, project news and information relevant to specific communities were published in the following 11 district newspapers.

In 2018 the company published on the company's public websites and newspapers the

project updates, information about social projects events, public meetings advertisements and etc.

Table 4: District newspapers for project news and information distribution

District	Newspaper(s)
Aniva	Utro Rodiny
Dolinsk	Dolinskaya Pravda
Kholmsk	Kholmskaya Panorama
Korsakov	Voskhod
Makarov	Novaya Gazeta
Nogliki	Znamya Truda
Tymovsk	Tymovsky Vestnik
Poronaisk	Express, Zvezda
Smirnykh	Novaya Zhizn
Okha	Sakhalinsky Neftyanik

2.6 Engagement with community and other non-governmental organisations

The annual public consultation and disclosure report, sustainable development report and other publications that may be of interest were provided during the course of the year. Company sent it in a proactive manner and upon requests. Details of these publications' distribution see in sections 2.2, 2.3.4, 2.3.6, 2.5, 2.7.2, Appendix 3 of this report.

During 2018 the company continued its regular engagement with community and non-governmental organisations as follows:

- Sakhalin based NGOs participated in the dialogs with stakeholders under sustainable development report preparation (twice a year, see section 2.2 and 2018 SD report, Appendix 2 http://www.sakhalinenergy.ru/en/media/sd_report/). No issues were raised by NGOs representatives.
- Cooperation with the Western Gray Whale Advisory Panel (during the year) in developing optimal solutions to minimise the impact on whales. During these meetings company's the Western Gray Whale Advisory Panel' representatives discussed the implementation of the corporate Marine Mammal Protection Plan (MMPP), updated in 2018 (see 2018 SD report, section 6.6 and 8.3.10 http://www.sakhalinenergy.ru/en/media/sd_report/).
- Cooperation with NGOs and social institutions within the framework of Social Development/Social Investment company's programmes/projects. Meetings were held routinely under SD/SI projects and programmes. During these meetings company's and NGOs and social institutions' representatives discussed the implementation of the social projects. Also, the representatives of NGOs and social institutions participated in SD/SI projects and programmes events (see section 2.4 and 2018 SD report, section 9.5 http://www.sakhalinenergy.ru/en/media/sd_report/).
- Cooperation with IP NGOs and organisations in framework of SIMDP and other programmes/projects. During these meetings company's and IP NGOs and

organisations' representatives discussed the implementation of the SIMDP projects and programmes/projects. Also, the representatives of NGOs and social institutions participated in the SIMDP projects and programmes/projects events (see 2018 SD report, sections 6.5 and 9.5.6 http://www.sakhalinenergy.ru/en/media/sd_report/).

Table 5 reflects the number of meetings held with organisations that have been consulted with, either as groups or separately in 2018.

2.7 Japanese stakeholder engagement

2.7.1 Introduction

Representatives of Sakhalin Energy were in contact with Japan-based specialists in trans-boundary issues, such as oil spill response (OSR) and biodiversity and have attended a number of conferences and meetings in 2018.

2.7.2 Materials available in Japanese

On topics that are of a relevant trans-boundary nature, Sakhalin Energy translates key public domain information into Japanese. Principally this includes information about trans-boundary environmental and social issues. The following materials are available in Japanese:

- executive summary of the ESHIA;
- sections of the Environmental Impact Assessment Addendum that have relevance in a trans-boundary context:
 - executive summary,
 - oil spill response,
 - baseline information on Steller's Sea Eagle,
 - marine mammals (other than Western Gray Whale),
 - marine and coastal commercial fisheries,
 - dredging and disposal in Aniva Bay,
 - material project changes since the 2003 EIA,
 - red data book and migratory birds,
 - executive summary of the IUCN report on February 2005 on the Western Gray Whale,
 - comparative environmental assessment report of the Western Gray Whale;
 - the corporate oil spill response plan for Sakhalin-2 project (phase 2);
 - the offshore Prigorodnoye oil spill response handbook;
 - minutes of Sakhalin Energy's public meetings in Sapporo and Tokyo in April 2006; and
 - executive summaries of the lenders' independent environmental consultant (IEC) site visits:

- IEC site visit report September 2008;
- IEC site visit report November 2008;
- IEC site visit report May 2009;
- IEC site visit report September 2009;
- IEC site visit report March 2010;
- IEC site visit report April 2010;
- IEC site visit report June 2010;
- IEC site visit report September 2011;
- IEC site visit report September 2012;
- IEC site visit report September 2013;
- IEC site visit report October 2014;
- IEC site visit report October 2015;
- IEC site visit report October 2016;
- IEC site visit report October 2017.
- Health, Safety, Environment and Social Action Plan (HSESAP), revision 3, 2010 and documents that have relevance in a trans-boundary context:
 - comparison of HSESAP revisions 2 and 3;
 - Appendix 1. HSESAP commitments to company standards;
 - international requirements for occupational health and hygiene;
 - international requirements for managing risk;
 - international requirements for hazardous activities;
 - international requirements for road transport;
 - loss prevention in design and construction;
 - international requirements for air emissions and energy management;
 - international requirements for water management;
 - international requirements for waste management;
 - international requirements for soil and groundwater;
 - international requirements for land management;
 - international requirements for biodiversity²;
 - oil spill preparedness and response;
 - Steller's Sea Eagles and endangered red birds;
 - marine mammals specification;
 - dredging.
- Health, Safety, Environment and Social Action Plan (HSESAP), revision 4, 2015;
- Section of the PCDP related to engagement with Japanese stakeholders.

² The International Requirement specifications related to the HSESAP are currently being revised. Versions in the Japanese language available on the Sakhalin Energy public website will be updated accordingly once revision of the HSESAP International Requirements has been finalised.

2.7.3 Public consultation activities in Japan

During 2018 the company undertook a number of consultation and engagement activities in Japan. This programme has been developed with feedback from stakeholders, including the participants at several meetings in Japan, which the company have attended and/or initiated.

Key stakeholder activities in 2018:

- 18 February – Mombetsu Oil in Ice Symposium.
- 19 February – Oil spill workshop in Mombetsu under the International Symposium.
- 20 February – meeting with Hokkaido Government and Hokkaido Fisheries Environmental Centre.
- 23 August – meeting with representatives of Japan Coast Guard in Otaru.

During the above mentioned meetings, the company representatives informed on the Sakhalin-2 project implementation status, OSR preparedness. The Sakhalin Energy specialists from Corporate Affairs Department participated in the meetings. There were no questions or issues raised during the meetings.

A review of the engagement activities in Japan has been undertaken internally at the end of Q4 2018 to determine the 2019 programme. The company has decided to continue the engagement.

2.8 Media and other interest groups

Sakhalin Energy's Corporate Affairs Department communicated regularly with representatives of the mass media as well as other interest groups such as educational and research institutions.

In 2018 representatives of Communication, Stakeholder Engagement and Event Management Subdivision conducted six media briefings.

Media were invited to participate in media briefings or other meetings by telephone, and email.

Table 5: Mass-media activities

Format	Frequency	Language
Media briefings for Sakhalin journalists	6	Russian
TV news stories	Regularly, depending on newsworthy occurrence	Russian
Publication of project related information in the district newspapers (please see the Table 3 for the list of newspapers)	12	Russian
Sakhalin Energy website	Regularly	Russian/English
Corporate news-bulletin <i>Vesti</i>	Monthly	Russian/English

Information bulletin "Social programmes"	Monthly	Russian
SIMDP information bulletin	Quarterly	Russian

3 COMMUNITY GRIEVANCE PROCEDURE

3.1 Reporting grievances

On regular basis the company distributes a community grievance leaflet, which advises those with a grievance on how they can lodge a grievance relating to Sakhalin-2 project activities. The community grievance leaflet and posters were revised in 2018 to include the up-to-date contact details. The leaflet and posters were issued and distributed among stakeholders in accordance with the plan of the information campaign on grievance procedure in the in 2018.

In 2018 the company ran a regular campaign on advertising of the grievance procedure aimed at distributing information on the grievance procedure among communities and contractors/subcontractors' employees. These included:

- Distribution of leaflets and posters in all project affected communities and among the contractors/subcontractors' employees (for example, offices at facilities, camps, etc.).
- Distribution of pocket calendars with information about the community grievance procedure in project affected communities.
- Districts newspaper announcements.
- A dedicated slide in every community presentation.
- Trainings for contractors to introduce community grievance procedure.

The grievance leaflet is also disseminated in Japan as part of the PCDP available in Japanese.

3.2 Grievance addressing in 2018

In 2018 the company received 38 grievances. Among grievances received in 2018, 44% were raised in connection with labour relations (contractor organisations); 13% – issues on camp management; 13% – issues on code of conduct, 16% – SIMDP implementation, 11% - impact on communities, 3% - other (contractual issues). For more information see the Table 6 below:

Table 6: Grievances lodged in 2018

Grievance category	Number of grievances lodged	%
Labour relations	17	44
Camp management	5	13
Code of conduct	5	13
SIMDP implementation	6	16
Impact on communities	4	11
Other (Contractual issues)	1	3
Total	38	100

As of end of 2018, 28 grievances were addressed and 23 of them were resolved. Besides, the company resolved one grievance that had been received at the end of 2017. All grievances were resolved within the time stipulated in grievance procedure (less than 45 working days).

Ten grievances were remained unresolved as per the end of 2018.

23 grievances were resolved with statements of satisfaction signed by complainants. For other grievances all practical measures have been taken by the company aimed to attain a resolution, however either a complainant did not express his/her opinion regarding the actions taken (4 grievances) or a complainant did not agree with the company's explanations (1 grievance). These grievances were closed through business integrity committee decision, in accordance with the grievance procedure.

As a regular practice, the company has kept monitoring and analysing the level of complainants' satisfaction with the grievance resolution and with the process of addressing the grievance.

3.3 Grievance procedure within the frame of Sakhalin indigenous minorities development plan

In 2018 partners of the plan continued to inform community about SIMDP grievance procedure (under the public meetings, during individual consultations, etc.). Besides, the information on grievance procedure is available in all communities of traditional indigenous residence and IP traditional economic activities (information materials about the grievance procedure were placed on the information boards and also available in non-governmental organisations, libraries, on website of the programme).

In 2018 six grievances were submitted as part of the SIMDP grievance procedure. As of end of 2018 three grievances were resolved and complainant signed the statement of satisfaction. Three grievances are under consideration.

These grievances were reviewed by members of the SIMDP grievance team according to the SIMDP grievance procedure. The status and results of these grievances resolving were controlled by the SIMDP Governing Board and the SIMDP external monitor.
